

## Learning Checkpoint

Please complete the following questions. They are designed to support your learning and help you develop your studying and time management skills by identifying the risks and opportunities, and reflecting on how you will engage with the unit, considering your external and internal constraints.

### Learning Plan

1. **Provide a brief statement on how you are progressing in SIT292 and whether there have been any highlights (or lowlights).**

I'm doing better now than at the beginning, I've developed a really efficient workflow that's keeping me on track. I've submitted both Modules 1 and 2 and I am about to submit Module 3 now (02/08/2025). The initial sprint was a little stressful, but now that the concepts are all gelling together better in my mind, I'm glad to say I'm officially back in "math-mode".

2. **Are you meeting the due dates for your selected target grade?**

I maintain strict deadlines throughout the week for when I should have the exercises/assessment completed. This gives me a good amount of breathing room to focus on my summary, since that's been the rockiest area in my start to this unit. Overall the pace is challenging but rewarding, and certainly not unattainable. My intention is to maintain the course to balance stress with timeliness. Overall I'm feeling much better about my ongoing approach.

3. **Provide a brief statement about whether you will make any changes to your learning plan, along with a realistic assessment of how you are going and any specific factors that have affected or could affect your progress over the next few weeks.**

I've chosen a solid approach for my learning plan and I intend to maintain it going forward. Balancing my workload remains my main priority to ensure I absolutely understand the core concepts, this will ensure I don't get lost along the way. I'm growing more satisfied with my summary quality with each week, so I'm focused on maintaining steady, predictable growth in each ULO. I had considered keeping my options open to enrichment tasks and a possible grade increase to Credit, but given the workload for this trimester I need to focus on the essentials. Given that, I'll maintain the course for all core modules.

4. **Copy and paste your learning plan below, making note of your progress against each of the modules.**

I've put a lot of work into consolidating modules 1-3, the latter is prepped for submission and I'm ready to start prepping module 4, which I'm on-schedule for. This week I'll have the module 4 submission prepped by Friday, for submission on Saturday. After that, module 5 has a buffer, so I'm looking forward to recovering from this 4-week sprint.

## I'm aiming to achieve a Pass

| Type                      | Description              | Week | Deadline          | (day)    |
|---------------------------|--------------------------|------|-------------------|----------|
| supp                      | Learning Plan            | 1    | 13 July 2025      | Sunday   |
| core                      | Module 1                 | 2    | 20 July 2025      | Sunday   |
| core                      | Module 2                 | 3    | 27 July 2025      | Sunday   |
|                           |                          |      |                   |          |
| supp                      | Check-in (Census 15 Aug) | 4    | 3 August 2025     | Sunday   |
| core                      | Module 3                 | 4    | 3 August 2025     | Sunday   |
|                           |                          |      |                   |          |
| core                      | Module 4                 | 5    | 10 August 2025    | Sunday   |
| < intra-trimester break > |                          |      |                   |          |
|                           |                          |      |                   |          |
| core                      | Module 5                 | 7    | 28 August 2025    | Thursday |
| supp                      | Check-in (WL Sept 8)     | 7    | 31 August 2025    | Sunday   |
|                           |                          |      |                   |          |
| core                      | Module 6                 | 8    | 7 September 2025  | Sunday   |
|                           |                          |      |                   |          |
